

AcquaBox

IP65

Increased degree of protection against dust and water.

Multistage Grommets

Grommet has several stages to adapt to the diameter of the conduit/cable.

Drain Holes

Evacuation of accumulated water in case of condensation or defect in the external conduits through the opening of the drain holes.

Quickness and Flexibility

The holes in the base allow the box to be fixed by means of cable ties.

Easy Opening

Housing to ease the opening of the box by means of a flat screwdriver.

Easy Installation

Distance between centers marked on the base and includes a housing for fixing by a single screw of double thread.

Cover Screws IP

The plugs included in the box guarantee the tightness covering the screw housing.

Back Knock-outs

Possibility of introducing conduits through the knock-outs in the base.

AcquaBox Sealed Boxes

The new range of sealed boxes AcquaBOX with clip-on cover has been developed to withstand severe weather conditions, guaranteeing water tightness in hostile environments of dust and water. The first quality materials used in its manufacturing together with the detailed design used in its development, combine in a box the robustness and versatility that all professionals need in a connection box for outdoor and indoor installations.

Part Number	Maximum Dimensions	Entries	Grommets Measures	Weight	Materials
3025	50 × 74 mm	4	20mm	47g	ABS, SBS grommets, halogen free materials
3026	50 × 78 × 78 mm	4	20mm	58g	
3027	50 × 84 mm	4	20mm	58g	
3028	50 × 94 × 94 mm	7	20mm	81g
